DISCLAIMER

The University of Otago Library does not provide legal advice. These are guidelines only.

Copyright

Copyright is an umbrella term covering the rights of ownership, reproduction, distribution and sale of a work. The laws relating to copyright are intended to protect the rights of an author while allowing for creative use of the work by others.

Copyright Ownership

The author or creator of a work owns the copyright to that work, until such time as they transfer all or part of those rights to another party, for example, a publisher, family member, or employer. In most cases, as an employee of the University of Otago, you own the copyright to your research work until such time as you transfer some or all of those rights.

Use of Works under Copyright

The Copyright Act has a 'fair dealing' provision which allows for use and reproduction of a copyright protected work in certain circumstances. Examples of fair dealing are use for private study, criticism and review, and reporting current events.

There is also an 'educational purposes' provision which allows the reproduction of an item for teaching purposes, for example, class readings.

For more information about copyright and how it may affect you please refer to the University of Otago copyright website at:

www.otago.ac.nz/administration/copyright/

Copyright Questions	Answers
Do I need to register copyright to ensure my rights are secured?	No. Copyright is automatically vested in the author of a work, once the work is in fixed format, e.g. photograph, electronic document, painting and so on.
What rights do I retain for use of my work after publication?	The rights you retain are determined by the publisher's contract agreement. Check your contract to see what rights you have for the use of your work.
Can I negotiate with my publisher to retain particular rights after publication?	You can negotiate retention of certain rights with your publisher. Add a SPARC Author Addendum to your contract agreement. For information on the addendum and when to use it, go to www.arl.org/sparc/author/ . You can also freely negotiate with your publisher for an amendment to your contract.
Does 'Fair dealing' mean I can store my publication on my personal web site?	No. Fair dealing does not cover personal use of a copyrighted document.

Creative Commons (CC)

Unpublished works such as PhD and Master's theses are often protected with a Creative Commons license. A Creative Commons license allows an author to define how others are able to use your work, whilst still retaining full copyright protection. There are six types of licence available; these are outlined in the table below. For more information please refer to www.creativecommons.org.nz/

Creative Commons License	Terms of use
 Attribution (BY)	Rework, tweak or build upon. Attribute. Commercial or non-commercial. Least restrictive license.
 Attribution –Noncommercial (BY-NC)	Rework, tweak or build upon. Attribute. Non-commercial use only. A new derivative work can have any CC license applied to it.
 Attribution-Noncommercial -No Derivative Works (BY-NC-ND)	No rework, tweak or build upon. Attribute. Non-commercial use only. Redistribution. Most restrictive license.
 Attribution-Noncommercial-Share Alike (BY-NC-SA)	Rework, tweak or build upon. Attribute. Non-commercial use only. A new derivative work must have this CC license applied.
 Attribution-No Derivative Works (BY-ND)	No rework, tweak or build upon. Attribute. Commercial or non-commercial. Redistribution.
 Attribution-Share Alike (BY-SA)	Rework, tweak or build upon. Attribute. Commercial or non-commercial. A new derivative work must have this CC license applied to it.
